## **INTRODUCTION AND PREAMBLE**

Medical Science is dynamic and it is essential for the doctor to become acquainted with the advances in medicine. This is in essence the concept of Continuing Professional Development (CPD). Tremendous advances are taking place in the field of medical sciences, continuously changing the concept, approach to management and the outcome of several diseases. The rapid pace of these advances makes it mandatory for doctors to keep themselves updated so that they may apply this information to their practice & thus fortify his/her competence and knowledge by keeping abreast with the latest developments in the field.

Importance of credit hours and updating knowledge of doctors has been globally accepted and also been approved by all the state medical councils on February 2012 and already endorsed by Medical council of India. This is necessary as the modern medical science is growing leaps and bounds and the update for any medical doctor is necessary for overall societal betterment. The doctrine of patient “deserves the best” has to be respected.
